Rajesh Nandhan

TECHNICAL ARCHITECT

Looking for an exciting opportunity with an ambitious business that wants to grow in all verticals

• Contact: (0091) 917 636 9387 • E-mail: rajeshnandhan@gmail.com • Location: Chennai, India

PROFILE AND VALUE

- An innovative and results-driven IT professional who always focuses on achieving exceptional results within highly competitive environments that demands continuous improvement.
- Holds 22+ years of robust experience in creating ideas that bridge IT and customer requirements and providing solutions for diverse industries including but not limited to e-Commerce, Education, Automotive, Oil and Gas, Healthcare.
- Demonstrated excellence in designing & developing software applications using various technologies, design patterns and understanding broader constraints of wider system definitions, customer requirements.
- Leading and managing software development teams by providing technical direction and ensuring that projects are completed on time and under budget in a structured environment.
- Collaborated with key stakeholders and architect team to define architecture principles, standards, guidelines, and blueprints.
- Foster strong, customer-focused relationships and ensure clear, transparent communication with project stakeholders and cross-functional IT teams to align technical solutions with business objectives

QUALIFICATION AND EXPERTISE

- Building Enterprise Software Solutions
- Building Internet of Things (IoT) product
- Building Technology Solutions
- Product Development
- Project Management
- Team Lead

TECHNICAL COMPETENCE

Technologies	• ASP.Net Core, ASP.Net MVC, Angular, React, WPF (MVVM), WCF, C#, TypeScript, Java Script.
Methodologies	• Agile (SCRUM, Kanban), Waterfall
Database	• MS SQL Server
Cloud Technology	• Azure
Protocols	• HTTP, MODBUS
Development Tools	• MS Visual Studio and Code, Azure DevOps, GitHub Enterprise, Rally, JIRA, TeamCity, MS Visio, Balsmiq, Postman, Modbus Poll and Slave, SourceTree, MS Team Foundation Server, Visual Source Safe 6.0, TortoiseSVN & Hg, IIS 6.0
Artificial Intelligence & Foundational Knowledge	• Spec-Driven Development using KIRO, CURSOR. Model Context Protocol (MCP) Service using .NET. Machine Learning Models using ML.NET. Build AI Agent using Microsoft 365 Copilot & .NET.
Foundational Knowledge	• Docker, Kubernetes, NodeJS, Jenkins

CERTIFICATION

- Professional Scrum Master (PSM) ® Certification

CAREER ACHIEVEMENTS

Software Architecture

- Delivered highly scalable, cloud-native enterprise solutions leveraging microservices architecture, micro-frontend design, and integrated business intelligence capabilities.
- Delivered IoT-based real-time Surface Data Acquisition (SDA) and Surface Control Unit (SCU) system for well monitoring and control in the oil and gas industry.
- Delivered various software solutions leveraging multiple architectural paradigms, including Single Page Applications (SPA), multi-tier Service-Oriented Architecture (SOA), Client-Server desktop applications, and MVC-based Web applications.
- Produced and reviewed key design artifacts such as Prototypes, Proof of Concepts, UI mockups, E-R diagrams, and database schemas.
- Authored and reviewed critical documentation such as Statement of Requirements (SOR), Software Architecture & Solution Specifications, HLD, LLD, Functional/Technical Specifications, and Test Cases.

Project and Product Management

- Led end-to-end product development lifecycle including initiation, estimation, planning, execution, and closure aligned with delivery goals.
- Actively participated in Agile Scrum ceremonies, collaborating with stakeholders to refine user stories and business requirements, manage product and sprint backlogs, prioritize deliverables, and ensure alignment between technical design and efficient delivery execution.
- Provided recommendations on product workflows, usability, and design consistency to enhance user experience and ensure alignment with business requirements and customer needs.
- Contributed to release management by coordinating release planning, preparing change requests, and maintaining delivery documentation to ensure smooth and successful production deployments.

Team and Resource Management

- Manage the team by setting clear goals, giving regular feedback and apprise associates.
- Conducted technical interviews to support project staffing and team scaling efforts.

Stakeholder Engagement

- Prepared and presented case studies and key project overviews to visiting customers and stakeholders, highlighting technical solutions and business value.
- Actively participated in project status meetings with stakeholders, capturing and following up on Minutes of Meeting (MoM) for effective communication and alignment.

CAREER PROGRESSION

Senior Digital Architect

Encore IT Services Solutions Pvt. Ltd. A Sonata Software Company. Chennai,
January 2020 to present.

Technical Leader

Petrolink Data Services Pvt. Ltd., Kochi,
April 2019 to November 2019

Technical Leader

TATA Consultancy Services., Chennai,
December 2011 to April 2019

Senior Software Engineer

EF Information System Pvt. Ltd., Bangalore,
August 2008 to November 2011

Software Engineer

Mercado Online Pvt. Ltd., Bangalore,
May 2006 to July 2008

Software Engineer

Rebha Technologies., Chennai,
March 2004 to April 2006

KEY PROJECTS

GREENMT
Enterprise Logistics Platform

- Developed a data-driven logistics solution for large-scale shipping networks, focused on optimizing parcel spend and delivery performance

Asp.Net Core, React, PostgreSQL, Azure DevOps and Azure

PHARMACY ANALYTICS AND SOLUTIONS

Clinical Analysis Solution for Healthcare Industry

- Designed and developed an enterprise architecture for Clinical Analysis in the healthcare domain, focused on pharmacy management to drive cost optimization and cost savings. Built as a Cloud-based platform using Microservices and Micro frontends, with integrated Business Intelligence to ensure high performance, modularity, scalability, and maintainability.

Asp.Net Core, Angular, MSSQL, MS Azure SQL MI, Azure Event hub, Azure Cache for Redis, Azure Function App, Azure DevOps, GitHub, MS Power BI

GATEWAY

Real-time well-sites monitoring and control system for Oil and Gas Industry

- Led the development of an IoT-based real-time surface data acquisition (SDA) and surface control unit (SCU) system that monitors temperature, pressure, and voltage in oil well-sites. Software integrated with electronic down-hole gauges and tools, hydraulic power units (HPU) for continuous and reliable data acquisition using down-hole sensors with parameters structured in register-based formats.

Angular4, Asp.Net Web API, TeamCity, TortoiseSVN, Modbus Poll and Slave

PLM REPORTING AND ANALYTIC

PLM Data Ingestion and Reporting System for Automotive Industry

- Designed and developed a Service-Oriented Architecture (SOA) solution using self-hosted WCF services to extract, consolidate, transform, and expose Product Lifecycle Management (PLM) data across multiple geographies, providing reusable services for both WPF desktop and ASP.NET web applications.
- Developed a WPF application to generate structured reports, along with an ASP.NET MVC application to deliver reporting capabilities and enable users to access and analyze PLM data through a web portal.

ASP.Net MVC, WPF, WCF, Telerik Rad Controls ASP.Net and WPF, MSSQL 2008R2, Teamcenter PLM, MS Window Services, Visual Source Safe

ELEKTRA-II

Education Tour Management System

- Client-Server architecture to modernize and unify two ASP.NET web applications into a WPF-based desktop with WCF services, improving operational efficiency, enabling tracking of student courses, accommodation, and international travel.

WPF4, WCF, ASP.Net 2.0, MSSQL 2005, MS Reporting Service 2005, IIS 6.0

indiaplaza
INDIA'S LARGEST ONLINE SHOPPING DESTINATION

E-Commerce website

- Developed e-commerce platform built on Microsoft Commerce Server and exposing payment gateway to channel partners. Developed Configuration modules to generate dynamic features such as top products and promotions.

ASP.Net 2.0, MS SQL 2000

EDUCATION

- Bachelor of Engineering in Electronics and Communication
  Thiruvalluvar College of Engineering & Technology, Madras University, Tamil Nadu, India.

LANGUAGE

- Tamil - Native Proficiency
- English - Full Professional Proficiency
